SIZE CHART

NOTE:

The measurements listed by us refer to the wearer (person) and not to the measurements of the respective garment!

If, for example, the chest measurement of a chef's jacket is 101 - 104 cm, this means that this product is suitable for a person with these chest measurements.

If your measurements are somewhere between two sizes - we recommend ordering the larger size.

LADIES

MEASURING

The assistance of a helping person is recommended. We recommend to wear tight-fitting clothing or underwear. Measure directly on the body. The necessary additions for the comfort or functionality are taken automatically by us during the creation of the textiles.

Please consider the following helpful measuring recommendations:

- 1 chest width:** It is measured at the widest part of the chest horizontally around the body.
- 2 waist width:** It is measured at the thinnest point horizontally around the waist.
- 3 hip width:** It is measured at the widest part of the buttocks horizontally around the hip.
- 4 inside leg:** It is measured from the crotch along the inside of the leg straight down to the floor.

SHOE CLASSIFICATION

SAFETY FOOTWEAR (200 JOULE PROTECTION CAP), EN ISO 20345:2011

SB	Meets all basic requirements, including type and design of protection cap, material requirements, thickness of outsole; can also have an open heel region.
S1	For areas where no exposure to moisture is expected. Basic requirements are met, with the addition of enclosed heel, antistatic, energy absorption in the heel region.
S2	For areas where some exposure to wet conditions is expected. Basic requirements are met, with the addition of enclosed heel, antistatic, energy absorption in the heel region, resistance to water penetration and water absorption.
S3	For areas where some exposure to wet conditions is expected and there is a danger of penetration by pointed and sharp objects. Basic requirements are met, with the addition of enclosed heel, antistatic, energy absorption in the heel region, resistance to water penetration and water absorption, midsole penetration protection, moulded outsole.
S4	As S1, but all-rubber or all-polymeric footwear (safety boots).
S5	As S3, but all-rubber or all-polymeric footwear (penetration-resistant safety boots).

PROFESSIONAL FOOTWEAR (WITHOUT PROTECTION CAP), EN ISO 20347:2012

Classified in accordance with the above system. Labelling: 0B-01-02-03-04-05

ADDITIONAL LABELLING (WITHOUT PROTECTION CAP), EN ISO 20347:2012

A	Antistatic footwear	P	Penetration resistance
CI	Cold insulation	SRA	Slip resistance on ceramic tiles with SLS (sodium lauryl sulphate)
E	Energy absorption of heel region	SRB	Slip resistance on steel floors with glycerol
HI	Heat insulation	SRC	SRC = SRA + SRB
HRO	Outsole resistance to hot contact	WRU	Uppers resistant to water penetration/absorption
ORO (FO)	Outsole resistance to fuel oil (petrol and oil)		

- Antistatic footwear
- Energy absorption in heel region
- Oil and fuel-resistant sole
- Upper made of breathable material
- Slip-resistant sole

- Machine washable up to 40 degrees
